DFE Chemie GmbH is a company in the chemical industry with its headquarters in Düsseldorf, Germany. The core business is developing, producing and distributing products in the field of surface treatment. In particular, pickling inhibitors in the FEPORID® range, sophisticated additives for improving the quality and effectiveness of the pickling of steel, have proven themselves as highly efficient and reliable.

Capacity for innovation and an edge in know-how govern DFE's commercial success. Thus, for example, the product FEPORID® 388 was able to win the 2011 German Industry Prize. The quality management is certified by the internationally

renowned TÜV Nord in accordance with ISO 9001. Continuous improvement of the processes and high quality standards are part of the corporate culture.

DFE operates globally with representatives and distributors in a multitude of European and non-European countries. Since 2010, the company has exported directly to China. In 2014, DFE Chemicals (Shanghai) Import & Export Co., Ltd. was founded as a distribution company with its own warehouse in Shanghai in order to expand activities in China. In order to strengthen the sales team at DFE Chemicals (Shanghai), we are looking to fill the following position as soon as possible.

Sales engineer for the region Hunan/Guangdong

Your responsibilities:

- Customer support and new customer acquisition (steel producers),
- Preparation of quotations and participation in calls for tender,
